Trilogy Circuits Shows Optimism for Growth by Expanding Its Facilities

Richardson, Texas – May 3, 2010 – [Trilogy Circuits](#), a premier electronics manufacturing services (EMS) provider based in Richardson, Texas, today announced the completion of its expanded facility. As other EMS providers took a passive approach to business during the recession, Trilogy Circuits remained optimistic by dismissing any notions of downsizing. The company noticed significant growth in all areas of its business and began expanding its production areas by doubling the size of its 10,000 square foot facility in 2009, giving the company plenty of room to grow with the emerging economy.

“Trilogy Circuits maintained a forward-thinking mindset by recognizing the potential for growth during the recession and pursuing it cost-effectively.” said Charles Capers, CEO of Trilogy Circuits. “With the expansion of our facility, we look forward to continued growth in all areas of our markets including government and the aerospace industries as well as expanding on our existing capabilities which include functional tests, box build and chassis units, printed circuit assembly and cabling assembly.”

Trilogy Circuits has already hired several production engineers and assembly technicians since beginning the expansion of its headquarters and production facility to 20,000 square feet and plans to increase its work force in the Dallas-Forth Worth area by an additional 20 percent over the next year. Trilogy Circuits is confident the facility expansion will result in a significant return on investment and increase the company’s volume of business and productivity.

[About Trilogy Circuits](#)

Trilogy Circuits provides turn-key services for the development of electronic devices and products. From printed circuit board (PCB) design to fully assembled boards as well as complete box and cable assemblies, Trilogy helps its customers achieve a faster time-to-market in an efficient manner. Trilogy Circuits has achieved an [extensive list](#) of industry certifications including AS9100B Aerospace Quality Standard System Certification in 2010. The company is headquartered in Richardson, Texas. For more information, visit www.trilogycircuits.com.
